Introduction

The secret to excellent kindergarten classroom management is organization. How a classroom looks, feels and runs is the responsibility of the teacher.

The better organized the teacher the more successful kindergarten will be for everyone. A well organized kindergarten classroom almost runs itself. Students feel safe, able to make decisions and have choices. The students know they are accepted as individuals and as valued members of the class.

This sounds so easy but many kindergarten classrooms do not function this way. My hope is this book will help new kindergarten teachers achieve an environment where everyone is happy and eager to participate every day.
